

M600

Notesbooks in the past were for office use only, but today they are gamer and multimedia PCs. Xilence offers a mobile USB notebook cooler to prevent these high performance notebooks from over heating. The integrated 200mm fan is powered by the notebooks USB port. The cooler comes with a power switch, two USB ports and the height is adjustable. Ideal escort when travelling!

Features:

- Protects your netbook from overheating and this extends the lifetime of the device
- 1x quiet-running 200mm fan provides optimal ventilation
- Adjustable tilt angle for maximum comfort
- Suited for notebooks up to 40cm (15,4")
