

## SNC110

---

Whereas laptops previously served as platforms for office applications only, they are now coming to replace gaming and multimedia PCs. In order to effectively shield these high-performance devices against overheating, Xilence offers the ultra-mobile SNC110 laptop cooler. The quiet-running 180mm fan achieves impressive air throughput at low levels of noise. Its especially compact design means that it can be used in a wide variety of situations, and can be adjusted precisely to the heat points on the bottom of the laptop.

### Features:

- Protects your netbook from overheating and thus extends the lifetime of the device
- 1x quiet-running 180mm fans provide optimal cooling
- Very slim and handy – ideal companion for travelling
- Unique anti-slip design
- Integrated USB port
- Suited for notebooks up to 40cm (15,4")

### Technical Data:

Dimension:	350 x 260 x 26mm
