

I110

The Xilence I-110 combines all features of a current CPU cooler for home and office. Thanks to the quiet-running 92mm fan the precisely manufactured heat sink gets reliable and quiet cool air all time. The fin design not only ensures efficient cooling of the CPU, but also cools all surrounding components. The fan speed of 2200rpm guarantees an ideal compromise between high air and quiet operation. This is why the Xilence I-110 is a very interesting Intel cooler in the beginner area.

Features:

- Silent hydro bearing 92mm fan
- Light aluminum heat sink for low noise development
- Fine aluminum fins for high airflow and efficient cooling
- Suitable for Intel socket 775

Technical Data:

Sockets Intel	LGA775
CPU max. TDP	65W
Fan Size	92 x 92 x 25mm
Fan Speed	2200 ± 10% RPM
Fan Control	no
Sound level	25 dB(A)
Thermalpaste	preapplied
Dimensions	95 x 95 x 56,5mm
Weight	260g
