

I140

The Xilence I140 combines all the characteristics of a modern CPU cooler for the home and office. Thanks to its quiet 92mm fan, the precision-manufactured heatsink is quietly and reliably supplied with cold air. The fan speed of 2200 RPM guarantees the ideal compromise between high air throughput and low-noise operation. The Xilence I140 is bulk-packaged, making it a highly interesting entry-level Intel cooler for system integrators.
